About the Company

The Avendus Group is a leading provider of financial services with an emphasis on customized solutions in the areas of financial advisory, capital markets, wealth management and alternative asset management. Avendus Capital is an Investment Bank, headquartered in Mumbai, India. The firm has established a dominant position as the go-to advisor in the Digital & Technology vertical with a track record of having worked with several of the leading Indian Internet brands including Flipkart, Ola, redBus, Quikr, Housing, etc. Avendus was also awarded the ‘Investment Bank of the year – PE’ award at the 4th VCCircle Awards 2015.

What does Avendus Research have to offer you?

India is fast emerging as one of the strongest growth stories among emerging economies. The Indian Internet market, which was valued at around $30B in 2014, is expected to witness more than a 10 fold growth in the next 5 years. India is the only other country other the US and China which has companies that feature in the list of top ten highest valued privately held companies in the world (a club that includes firms like Uber & AirBnB). However, the industry is severely constrained by the lack of availability of high quality, insightful research.

Avendus has worked with 4 out of the 6 unicorns and has a 40% share of the banked transaction market in the Indian digital market. Given its width and depth of relationships and insights in the Indian Internet market, Avendus is creating a deep-research team that will provide data, insights and networking opportunities for the ecosystem. This team would strive to become a think tank for the industry to track and forecast emerging trends, growth opportunities, potential disruptors, ecosystem dynamics, etc.

What are we are looking for?

- A recent grad/undergrad from a top tier school with a major in Economics, Business, Journalism, Communications, or something related
- Someone super excited about technology, Internet disruptions, venture funding, start up ecosystems and all the rest of the dynamic turbo-charged environment that digital offers
- Deep analytical skills with the ability to think out-of-the-box, look beyond the obvious & build creative, original points of view on the industry
- A self-starter with extreme attention to detail. We are looking for someone who can produce high quality, professional & well-researched articles, whitepapers & reports
- Excellent written & verbal communication skills
- A voracious reader with a knack for numbers; a strong mathematical acumen to be able to build data-based arguments

More about the position

We are looking for smart, young people who would like to be part of this journey. Currently hiring for both full-time career positions as well as for 1 year internships. The position would be based out of Mumbai, India. Remuneration will be on par with prevalent industry benchmarks.
